

# Simplifying Setup & Improving Sound for the Portable Church

with an Aviom Digital Snake

## Aviom Digital Snakes At A Glance

- Setup that's fast and easy
- Plug-and-play connectivity without complex programming
- Simple for volunteers to learn and use
- Reliable, high fidelity audio
- A system that scales to meet the needs of the growing church
- Easy to transport and store
- Seamless integration with Aviom's Personal Mixers

## Audio requirements for the portable church

Selecting audio equipment and training volunteers and staff how to use a system can be a challenge for any church. But that's even more of a challenge for churches that need to ensure great sound from a system that they have to set up and tear down with each service.

## Aviom for the portable church: a unique solution

Aviom digital snakes are simple and reliable, so you can have outstanding audio and a seamless worship experience every week.

Whether you pack up your gear and haul it away each week or are able to store it on site, an Aviom digital snake will simplify setup, teardown, and use—while also providing outstanding audio quality and unparalleled flexibility. Aviom solutions are scalable, modular, and easy to reconfigure, so your system can grow and evolve along with your ministry.

## Simple setup, reconfiguration, and expansion

For the portable church, setting up for each service has to be both fast and easy. With an Aviom digital snake, you can connect the platform or stage area to the front of house mix position and be up and running in a matter of just a few minutes. And integrating other consoles or locations— monitors, recording, multipurpose rooms, and the like—is equally straightforward. Even reconfiguring for special events is simple and intuitive.

## Plug-and-play equipment with simple user interfaces

Most churches rely, at least in part, on volunteers to support weekly services. Aviom systems are powerful yet intuitive, so both novice and experienced users alike will be able to quickly connect devices and make adjustments to meet each week's needs. No computer-based configuration is required at any time.

## Reliable sound every time

A-Net®, the technology behind all of Aviom's products, is designed specifically for delivering high quality audio without interference, so audio is clear and transparent even when you are in a location where the electrical environment is unpredictable or unknown.

## Aviom as a long-term solution

Many churches are portable only temporarily. An Aviom digital snake will meet the needs of a portable church and can grow with that church as it establishes itself in a permanent sanctuary. Even as the needs of the church change—adding a monitor or broadcast console, accommodating for overflow in a separate room, setting up for special events in a gym or multipurpose room—an Aviom system can be scaled seamlessly to meet those changing audio requirements.

*"I have the opportunity to use our Aviom gear every day, and I can tell you that we simply would not be able to do everything we do without it. Going from a 1200-seat sanctuary to basketball courts usually takes about 15 minutes."*
